

Company

Japanese Engine, Inc. has been in business for more than a decade and is a member of the Better Business Bureau (BBB). We respect and adhere to the BBB's standards and guidelines for best business practice and are especially proud of the fact that most of our retail and installation business comes via referrals from satisfied customers.

Japanese Engine has been in business for more than a decade and is a member of the Better Business Bureau (BBB). We respect and adhere to the BBB's standards and guidelines for best business practice and are especially proud of the fact that most of our retail and installation business comes via referrals from satisfied customers.

Sales and Servicing are the two major divisions of our business.

Sales

Our Wholesale Sales division concerns itself with importing and supplying engines and transmissions to resellers and installers in North America. We regularly import stock of high demand products as well as special orders to meet the very unique and specific needs of you, our valued wholesale customer.

Are you tired of shopping around town and not finding the goods you need at prices you can still make a living on? Speak to us and let's do business. We'll ship to anywhere in the USA or Mexico.

Our Retail Sales division engages directly with retail customers, selling and sourcing (where required) the engines and transmissions you need to keep your vehicle on the road.

Is your engine/transmission tired? Do you want to pimp your ride and get maximum performance, within legal limits? Come and talk to us and let's find a solution that fits your needs and pocket too.

Servicing

Our Servicing division will install your engine or transmission and service and/or repair most motor vehicle types and models.

You'll find our turnaround times and prices are very competitive too, so speak to us first! It's easier if we simply do it right for you the first time, than for us to repair others' mistakes.
